

Etsy Pricing Cheat Sheet 2026

What Etsy takes from a sale, and the lowest price that still pays you.

The Etsy fee stack (US seller)

Fee	Rate	Charged on
Listing fee	\$0.20	Each listing you create or renew. A multi-quantity listing renews for \$0.20 each time one sells, so count \$0.20 per sale.
Transaction fee	6.5%	Item price + shipping you charge + gift wrapping.
Payment processing	3% + \$0.25	The whole order total, including shipping and tax.
Offsite Ads	15% or 12%	Only orders that come from an Etsy ad on another website (30-day window). 15% while your shop is under \$10,000 in sales over 365 days, and you may opt out. 12% once you reach \$10,000, mandatory for the life of the shop. Capped at \$100 per order.
Currency conversion	2.5%	When your listing currency differs from your payment account currency.
Etsy Plus (optional)	\$10 / month	Includes 15 listing credits and \$5 of Etsy Ads credit each month.

Payment processing in other countries

Country	Payment processing	Regulatory fee
United Kingdom	4% + £0.20	0.48%
Canada	3% + CA\$0.25 (4% for international orders)	0.50%
Australia	3% + A\$0.25 (4% for international orders)	none
Germany, Ireland, Netherlands	4% + €0.30	none
France	4% + €0.30	1.14%
India (via Payoneer)	5% + INR 25	0.05%

The transaction fee (6.5%) and the \$0.20 listing fee, converted into your currency, apply in every country. Etsy may also add VAT to seller fees depending on your business status.

The one formula to remember

Buyer total = (profit + cost to make + postage + fixed fees) ÷ (1 - percentage fees)

For a US seller the fixed fees are \$0.45 (\$0.20 listing + \$0.25 processing). Percentage fees are 9.5% (6.5% + 3%) with no ads, 24.5% with a 15% Offsite Ad and 21.5% with a 12% Offsite Ad.

Lowest price that still pays you

US seller, shipping included in the price, one sale. Rounded up to the next cent. Find your total cost per sale in the left column, your profit target across the top.

No Offsite Ad (3% + \$0.25 processing, 6.5% transaction)

Your cost per sale	Profit \$5	Profit \$10	Profit \$15	Profit \$25
\$0 (digital)	\$6.03	\$11.55	\$17.08	\$28.13
\$2	\$8.24	\$13.76	\$19.29	\$30.34
\$5	\$11.55	\$17.08	\$22.60	\$33.65
\$10	\$17.08	\$22.60	\$28.13	\$39.18
\$15	\$22.60	\$28.13	\$33.65	\$44.70
\$20	\$28.13	\$33.65	\$39.18	\$50.23

The sale came from a 15% Offsite Ad

Your cost per sale	Profit \$5	Profit \$10	Profit \$15	Profit \$25
\$0 (digital)	\$7.22	\$13.85	\$20.47	\$33.71
\$2	\$9.87	\$16.50	\$23.12	\$36.36
\$5	\$13.85	\$20.47	\$27.09	\$40.34
\$10	\$20.47	\$27.09	\$33.71	\$46.96
\$15	\$27.09	\$33.71	\$40.34	\$53.58
\$20	\$33.71	\$40.34	\$46.96	\$60.20

If your shop is over \$10,000 a year and Offsite Ads are mandatory, the 12% rate sits between the two tables. Cost per sale means materials, packaging and postage added together.

Why cheap digital downloads hurt

Digital download, US seller, no ads, no shipping. The \$0.45 of fixed fees weighs most on low prices: below about \$4, Etsy takes more than a fifth of the sale.

Price	Etsy fees	You keep	Share to Etsy
\$2	\$0.64	\$1.36	32%
\$3	\$0.73	\$2.27	25%
\$5	\$0.93	\$4.08	19%
\$10	\$1.40	\$8.60	14%
\$20	\$2.35	\$17.65	12%
\$50	\$5.20	\$44.80	10%

Seven ways to keep more of each sale

Small changes that add up across a month of orders.

1. Opt out of Offsite Ads while you can

If your shop has made less than \$10,000 in sales over the last 365 days, you can opt out. Once you pass \$10,000 the 12% fee becomes mandatory for the life of the shop, so know where you stand before you decide.

2. List in your payment account currency

Listing in a different currency adds a 2.5% conversion fee on the sale amount. Buyers still see prices in their own currency.

3. Price cheap items with fixed fees in mind

The \$0.20 and \$0.25 do not shrink with the price. Bundle low-priced files or raise the price instead of hoping volume will cover it.

4. Charge what shipping really costs

Etsy takes its percentage fees on the shipping you charge as well as on the item. Padding shipping only adds fees, and under-charging eats your profit.

5. Count the listing fee on every sale

A multi-quantity listing renews for \$0.20 each time a unit sells. Build that into your price rather than treating it as a one-off.

6. Check your country's extras

Regulatory operating fees, VAT on seller fees and, in some countries, Payoneer withdrawal fees all sit on top of the headline rates.

7. Compare real numbers once a month

Estimates are a starting point. Your payment account statement shows what Etsy actually charged, so check your margin against it every month.

Track the whole shop, not one sale

The Online Seller Profit Toolkit is an Excel workbook with a fee calculator for Etsy, Amazon, Shopify and eBay, a monthly profit and loss sheet, an inventory tracker and a dashboard. [See it on Gumroad](#) (\$19).
